

Brainy's Share Market Price Charts — Unlocking the Secrets
(Technical Analysis)
2-hour “short” seminar — January 2019
Session Synopsis

Share market price charts summarise the underlying opinions and emotions of the real market participants. Every price chart tells a story, and it pays to understand the stories in the price charts. Why does the share price of a particular stock rise to a particular level, and then sell off, only to fall for a while and then start to rally again? This 2-hour session provides an introduction to the topic of how to “read the stories” in the price charts — the subject of Technical Analysis.

- 1 Technical analysis — overview and useful
- 2 Price charts:
 - 2.1 Lines charts versus candle charts,
 - 2.2 Support, Resistance
 - 2.3 Periods — daily, weekly, monthly.
- 3 Trends — up and down (and none)
- 4 Simple indicators (eg. Moving Average, Momentum, MACD)
- 5 Volume is important
- 6 Chart patterns (eg. Triangles, Tops, Head and Shoulders)
- 7 Candlestick patterns
- 8 How to implement and use it
- 9 Next steps and tips, learning more — it's a journey
