Trading with the Authors

The BullCharts software incorporates the concept of "Author Strategies". These strategies have been developed by influential authors and active traders and are included in the software to provide an excellent choice of tools to make it easier for the BullCharts user to learn and implement them. A number of articles are included in this section of Brainy's articles on BullCharts, describing the relevant scans, indicators and templates related to specific author strategies.

These strategies are implemented in BullCharts as follows:

- As individual Scans for stock selection.
- As Indicators that can be readily applied to any price chart.
- Some of the strategies are also implemented as BullCharts chart Templates.
- Where the strategies are implemented, there is usually more information about the source of the strategy bundled within the Scan or Indicator — see the properties of each scan or indicator for details.
- See a summary list of the strategies and authors in the BullCharts help (hit the F1 key and Search for "authors"), or see the 2-page PDF "Trade with the Authors" information leaflet.

Following is a very brief list of just some of the author strategies that are implemented in the BullCharts software.

Alan Hull — "*Charting in a Nutshell*", "*Active Investing*", various *Course Notes* — Alan Hull Range Rising and Falling Indicator; Alan Hull Money Histogram; Price/Volume Breakout Scan; Price Volume Breakout Marker, Alan Hull Rate of Annual Return (ROAR); Money Flow; Alan Hull MMA, Rate of Annual Decline Indicator (ROAD).
